SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1. The new transformer station, Pasewalk/Ost, will be erected just to the south of the Pasewalk-Grambow railway line, and the high tension pylons leading to and from the new station will follow a line approximately 25 m. from and parallel to the railway.
2. The following high tension overhead lines will be connected with the Pasewalk/Ost transformer station:
  - (a) 110 kv overhead line Pasewalk-Eggesin which will be connected to the Pasewalk/Ost station and the existing transformer station Pasewalk/West, and will be connected also to the new 110 kv overhead line to the Eggesin transformer station. The present overhead line from the transformer station Pasewalk/West ends in a temporary transformer station on the site of the projected new Pasewalk/Ost station.
  - (b) A 110 kv overhead line will run from the new transformer station Pasewalk/Ost-Granzin.
  - (c) A 110 kv overhead line from Pasewalk/Ost to Greifswald is also planned.
  - (d) A 110 kv overhead line to Eggesin is under construction.
3. Work on the new Pasewalk/Ost transformer station has progressed beyond the survey. The planned completion date is the end of 1960. An alignment of a rail spur from the Pasewalk-Grambow line to the planned new transformer station has been planned, but details are not yet available.

Pylon number 27, which is the end pylon of the connection between Pasewalk/West-Pasewalk/Ost, has already been erected. This completed construction of the Pasewalk/West-Pasewalk/Ost overhead connection.

Pylon number 1 of the main connection Pasewalk/Ost-Eggesin is already in position.
